To my fellow spiritual travelers,

Unity is based on one simple principle: there is One Presence and One Power in our lives and in the universe: GOD. All New Thought churches teach this. It is in the way that we present this teaching that I believe makes all the difference. The churches that are flourishing today, whether they be New Thought centers or mainstream Christian churches, do so because they are offering people a new way of perceiving the world. **Sacred Place Ministries**, my ministry in Missouri and nationwide, does just that!

Sacred Place Ministries accomplishes this by empowering individuals to seek a closer relationship with God through my dynamic messages, powerful alternative services and special events, retreat programs and workshops, uplifting and exciting music, as well as traditional worship experiences. I am committed to bringing about change in the world by helping others in transforming their lives.

I have one basic teaching that I present in everything that I do, ***we are that One Presence and One Power in expression!*** The only real work we have to do is to be fully present and allow the creative and vibrant Power, that desires to express as us, to take us to the next level of spiritual awareness.

We are unified with the One Living Substance!
